Arthritis and Osteoporosis

CONDITIONS

MOORE THAN ARTHRITIS | PRACTICAL, TRUSTED, PERSON-CENTRED

What this guide is about

Arthritis and osteoporosis are different conditions, but they can overlap. Reduced activity and some medicines can affect bone strength, so individual risk assessment is useful.

Practical next steps

- Notice the pattern: affected areas, timing and how long stiffness lasts.
- Ask what diagnosis is being considered and what treatment aims to achieve.
- Keep moving within a tolerable range; ask about therapy support if needed.
- Seek prompt advice for a hot swollen joint, fever, sudden eye symptoms or rapid decline.

KEEP THE WHOLE PERSON IN VIEW

This resource supports informed conversations. It does not diagnose, replace personalised medical advice or create legal advice.
